Certificate of

# BVDFree England

## Test Negative Herd Status

This certifies that:  
(Registered company name)  
(Registered farm name)

Had 2 consecutive annual BVD testing results – **ANTIBODY** FREE on: (Date)  
(Date)

**For details of BVDFree England and what this testing means please visit our website [www.bvdfree.org.uk](http://www.bvdfree.org.uk)**

The testing result is only an indicator of the Herd BVD status at the date of testing. Any exposure to BVD after the testing date could change the status of the herd and pose a risk to the purchasers herd.

Disclaimer: The testing result is based on a representative sample taken on the above date of selected management group(s) of the whole herd and BVDFree England Ltd take no responsibility for the interpretation of the testing results nor for errors made by the relevant veterinary surgeons who carry out the test, the laboratory who interpret those test results or for the movement onto the CPH after the date of the test.

This status will need to be maintained via continued testing and is only certified on the date the testing took place, for the live status of every holding signed up to BVDFree England, please see [www.bvdfree.org.uk](http://www.bvdfree.org.uk) and enter the CPH number on the homepage.
