

Certificate of

BVDFree England

Test Negative Herd Status

This certifies that:
(Registered company name)
(Registered farm name)

Had 2 consecutive years of BVD testing results – **VIRUS FREE**

For details of BVDFree England and what this testing means please visit our website www.bvdfree.org.uk

The testing result is only an indicator of the Herd BVD status at the date of testing. Any exposure to BVD after the testing date could change the status of the herd and pose a risk to the purchasers herd.

Disclaimer: The testing result is based on samples taken and submitted over the previous two years and BVDFree England Ltd take no responsibility for the interpretation of the testing results nor for errors made by the relevant veterinary surgeons or Farmers who carry out the test, or the laboratory who interpret those test results.

This status will need to be maintained via continued testing and is only certified for the period the testing took place, for the live status of every holding signed up to BVDFree England, please see www.bvdfree.org.uk and enter the CPH number on the homepage.
